

Extension Ringers / Alerts

External Ringer: RST952

For Remote Satellite Terminal

The RST952 provides an extension ringer option for the Remote Satellite Terminal RST100 and the IntelliDOCK RST310

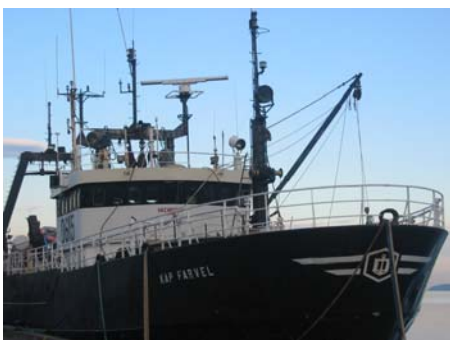

The extension ringer/call alert provides an amplified alert with volume, pitch controls as well as an on/off button.

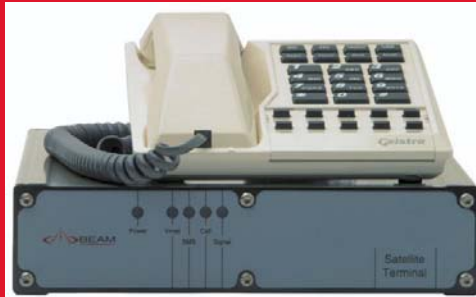

The ringer is also suitable for noisy environment where a standard telephone handset ring when used with the RST100 is insufficient.

The RST952 is also required to provide ring indication when the RST100 is used with the Motorola Intelligent Handset

The RST952 conveniently works with standard Telephone RJ11 connection and therefore is easily installed on the RST100.

Remote Satellite Terminal RST100

Remote Satellite Modem RST200

IntelliDOCK RST310

External Ringer: RST953

For Remote Satellite Modem

The RST953 provides an extension ringer option for the Remote Satellite Modem RST200.

The ringer is suitable for noisy environments where the extension ringer/call alert provides an alert tone that is louder than the standard Intelligent handset ring-tone.

The RST953 conveniently plugs into the Comm.'s port of the RST200. The cable connector provider then allows for this port to be replicated.

The RST953 comes complete with 5 metres of extension cable and can be easily extended.
